
Excimer Lasers Applications Beam Delivery

introduction to laser materials processing - 4 introduction what is a laser? • a laser is a device which generates or amplifies light • laser is the acronym for light amplified stimulated emission of radiation • essential elements of a laser • laser medium (gas, liquid, solid) • pumping process – must achieve a population inversion • optical feedback elements – single or multiple pass **8. laser applications - nakladatelství arsci** - modern topics in physics 204 co 2 spectrum and the nd:yag lasers, of a wavelength of 10.6 nm and 1.06 nm, respectively. welding, as against some other processes, uses a lower intensity optical beam and a longer laser pulse [of the order of ms]. **ssom2009 material processing in the industrial environment ...** - a company of the i n d u s t r i a l - l a s e r s 13 th ssom engelberg lectures on optics 2009 #3 material processing in the industrial environment lasag company presentation lasag core markets **facts about laser technology laser cutting** - 2.2 lasers for laser cutting many lasers can be used for laser cutting, provided their beam can be focused on a small spot with sufficient intensity to **strategies for beam homogenizing - ams technologies** - suss microoptics sa jaquet-droz 7 ch-2007 neuchâtel switzerland tel +41 (0)32 720-5103 fax +41 (0)32 720-5713 e-mail info@suss technical information sheet 10 - beam homogenizer **product guide - mta-it - plastics wine: the product of a complex blend of art and science. the precise control of process temperatures is one of the primary requirements in modern winemaking. fiber bragg gratings: fundamentals and applications** - the first fiber grating has been discovered accidentally by hill et al at the canadian research center, ottawa in 1978, hill et al studied nonlinear effects 1 m germanium-doped silica fibers argon visible light (488 nm) under prolonged exposure, fiber attenua- tion increased 4% fresnel reflection ⇒ standing wave pattern inside the fiber
