
Exciton Plasmon Interactions Metal Semiconductor Nanostructures Potentials

exciton plasmon interactions in metal semiconductor ... - in the metal counterparts. such exciton-plasmon interactions allow design of absorption and emission properties, control of nanoscale energy-transfer processes, creation of new excitations in the strong coupling regime, and increase of optical nonlinearities. with the advancement of novel fabrication techniques, the **exciton-plasmon interactions and fano resonances in ...** - exciton-plasmon interactions and fano resonances in nanostructures alexander govorov department of physics and astronomy, ohio university, athens, ohio, usa supported by: nsf, air force research office, a. v. humboldt foundation, bnnt institute at ohio u. **near-field interactions between metal nanoparticle surface ...** - rate.11–13 these plasmon–exciton interactions, together with the sensitivity of the lspr to the dielectric environment, give metal nanoparticle–organic molecular systems potential applications in organic and dye-sensitized photovoltaic cells,14–19 organic light emitting devices,20,21 chemical and **plasmon-exciton polaritons in two-dimensional ...** - used as a springboard to tailor plasmon-exciton interactions in 2d materials interfacing 3d metallic structures, potentially opening new avenues to engineer the interplay between light and matter on the nanoscale. theory and results. the dispersion relation for polaritons sustained at a dielectric/tmdc/metal interface, such as the **plasmon-exciton polariton condensation evidenced through ...** - plasmon-exciton polariton condensation evidenced ... the boundary between a metal nanoparticle and a dielectric material. in fact, compared to photo-ionic modes in microcavities, lsps have unique properties, including the connement of light in ... of particle-particle interactions with respect to uctuations induced by pumping and dissipation. **coherent plasmon-plasmon and plasmon-exciton interactions ...** - coherent plasmon-plasmon and plasmon-exciton interactions at the nanoscale martin wersäll department of applied physics chalmers university of technology abstract noble metallic nanoparticles which supports localized surface plasmon resonances, offers a variety of potential scientific as well as industrial applications. due to a **plasmon-exciton interactions in all-inorganic nanocrystal ...** - plasmon-exciton interactions in all-inorganic nanocrystal thin films alexa johnson honors project submitted to the university honors program at bowling green state university in partial fulfillment of the requirements for graduation with university honors 29 april 2013 mikhail zamkov, physics ____ advisor **coherent exciton-surface-plasmon-polariton interaction in ...** - coherent exciton-surface-plasmon-polariton interaction in hybrid metal-semiconductor nanostructures ... many groups have investigated similar interactions in close proximity of metallic ... **exciton/plasmon polaritons in gaas/gaalas heterostructures ...** - exciton/plasmon polaritons in gaas/gaalas heterostructures near a metallic layer ... interactions between sp and emitters have been also in-tensively studied. in the weak coupling regime, a two or- **ultrafast dynamics of plasmon-exciton interaction of ag ...** - ultrafast dynamics of plasmon-exciton interaction of ag nanowire- graphene hybrids for surface catalytic reactions qianqian ding,1, 2, 3, ... to graphene is 534 108 fs, and the metal plasmon enhanced graphene plasmon is about 3.2 0.8 ps in the vis region. the graphene-ag nanowire hybrids can be used for plasmon-driven **plasmon-exciton coupling in symmetry-broken nanocavities** - the low sensitivity of plasmon-exciton interactions to geometric asymmetry. on the other hand, we find that a more complex spatial and spectral dependence of qe-sp coupling takes place in cavities presenting material asymmetry, such as two-metal and metal-dielectric dimers. special issue: strong coupling of molecules to cavities received: june ... **metal semiconductor nanoparticle hybrids formed by self ...** - light.5–7 in hybrid structures, the exciton can couple to metal nps and drive the plasmon.8 conversely, the large fields at metal nps associated with the plasmon resonances can interact with excitons confined in qds. the resulting hybrid system can have different properties than the sum of the constituent **strong coupling between localized plasmons and organic ...** - strong coupling between localized plasmons and organic excitons in metal nanovoids y. sugawara, t.a. kelf, and j.j. baumberg ... attention has been paid to the interactions between local-ized plasmon modes and other delocalized electronic and excitonic states. ... the exciton-plasmon polaritons are described by 1 2 p f lp xgdisplaying half ... **exciton-plasmon interactions between cds quantum dots and ...** - the metal nanoparticle and the nonconductive environment. both, exciton and plasmon frequencies can be controlled by shape and size. exciton-plasmon interactions occur when semiconductor and metal nanoparticles are in close proximity. these interactions are manifested as a suppression or enhancement of the semiconductor emission. **exciton diffusion, splitting excitons and exciton-plasmon ...** - exciton diffusion, splitting excitons and exciton-plasmon interactions george c. schatz northwestern university quantum days, bilbao, july13, 2015 ... metal organic frameworks ... plasmon/exciton interactions lead to enhanced luminescence gilles r. bourret, tuncay ozel, martin blaber, chad m. shade, george c. schatz, chad a. mirkin, nano lett ...
